**Cooperative**

# What is an energy cooperative?

Co-operative Energy Ltd

# **Cooperative**

**An energy cooperative is a business established to provide reliable, at-cost energy service to its consumer members who are the owners of the business.**

Co-operative Energy Ltd

An energy co-operative is two things: an energy business and a cooperative.

Co-operative Energy Ltd

# **Coop**eration

**Member ownership and control  
of a co-operative is all about  
people working together to  
provide a service or product to  
meet a common goal.**

Co-operative Energy Ltd

**There are more than 2000  
cooperative businesses of many  
different types throughout  
Australia owned by their  
members. In the U.S.A. there  
are nearly 50,000 co-operatives.**

# **Cooperation**

## **When people cooperate.**

- Farmers unite as cooperatives to market their products
- Parents get together to form childcare cooperatives
- Neighbors join together to provide services through cooperatives

All are doing together what they could not accomplish individually

Co-operative Energy Ltd

**An energy co-op looks like any other utility, with wires and poles or pipes, equipment and trucks...but being a cooperative makes it distinctly different because the consumer members control the assets and operations through member adopted rules.**

# **Cooperative**

**The board, the manager and the employees are all charged with the responsibility of giving voice to the members.**

Co-operative Energy Ltd

# Coopera**tion**

- The co-op reports to the members...
- Holds an annual meeting...
- Sends out publications...
- Meets one-to-one with customers.

to keep its member owners up to date, and give opportunity for member input and, ultimately, control.

Co-operative Energy Ltd

# **Cooperation**

**In the USA there are 934 energy cooperatives representing the largest electric utility network in the United States with combined assets of \$US69 billion, employing more than 61,000 people and owned by 12 million members.**

Co-operative Energy Ltd

**There are two energy co-operatives in Victoria – Co-operative Energy Ltd and Southern Energy Co-operative Ltd. There is also Co-operative Purchasing Services Ltd.**

Co-operative Energy Ltd

**Cooperative**

**In Victoria Co-operative Energy Ltd is working with councils in North East Victoria and Gateway BEET in North West Victoria. Co-operative Energy Ltd is committed to giving cooperatives a voice and protecting consumers as the energy industry is deregulated.**

Co-operative Energy Ltd

**Co-operatives are the fastest growing form of electric utility in the USA - adding three times the number of customers as the industry as a whole.**

Co-operative Energy Ltd

# **Cooperation**

**Most of these energy co-ops in the USA are electric distribution and retail co-ops and some are electric generation and transmission cooperatives. Increasing numbers of these cooperatives are also involved in gas, water & wastewater distribution and retailing.**

# **Coopera**tion

New energy cooperatives are forming in the U.S.A. to take advantage of “the power of many.” We have the same challenge and opportunity in Victoria.

Co-operative Energy Ltd

**Cooperative**

**New energy purchasing cooperatives in the U.S.A. and Australia represent organizations or individuals that combine forces to negotiate and buy energy services.**

Co-operative Energy Ltd

# **Cooperation**

**In the USA they range from California fruit growers to housing co-operatives in Manhattan. The co-op way of doing business is booming! It can also boom in Victoria if we accept that the co-operative way is the best way – that dependence on changing governments and their policies is not enough.**

Co-operative Energy Ltd

**Coop**eration

**There's more to an energy co-operative than words can convey.  
The co-operative spirit makes an energy utility unique.**

Co-operative Energy Ltd

**Cooperative**

**It's all about you and me. We  
own it. We use it. We pay its  
bills, and we share the profits.**

Co-operative Energy Ltd

# **Cooperative**

**People like the co-operative idea. Research in the U.S.A. reveals that the concept of an organization dedicated to the common goal of its users is very appealing.**

Co-operative Energy Ltd

In fact, the more people know about co-ops, the more they like co-ops. In Victoria, however, we're more focused on changing and regulating investor-owned companies – ignoring the co-operative history and presence.

Co-operative Energy Ltd

# **Cooperation**

**Members of co-operatives in the U.S.A. and Australia like having a voice, and they like the local community ownership and involvement that cooperatives foster. Of course, there are critics of co-operatives – experts who oppose economic democracy.**

**In Victoria we need to rediscover our past  
and present – the forgotten role of co-  
operatives in empowering individuals and  
their communities.**

Co-operative Energy Ltd

# **Cooperative**

**An energy co-operative works for us. It takes our concerns and gives us a voice in energy needs and issues. We have no voice with investor-owned companies. We are the objects of their surveys and focus groups.**

Co-operative Energy Ltd

**Coop**eration

**It's people and service — not profit — which drive energy co-operatives. Co-ops are people-centred businesses. This is the co-operative essence. It is not a marketing ploy to capture and retain consumers.**

Co-operative Energy Ltd

**Coop**eration

**Your co-op is made up of  
people...from employees who  
work at it every day, to the board  
members you elect to serve you.**

Co-operative Energy Ltd

**Coop**eration

It's personal...  
a spirit,  
and...

Co-operative Energy Ltd

**Coop***eRation*

**Things happen when  
people co-operate.**

**Do we dare to co-  
operate?**

Co-operative Energy Ltd
